Summary

I am a flifth-semester informatics student at Alma Ata University, Yogyakarta, with a strong passion for developing skills and knowledge in the field of information technology. My studies have given me an understanding of programming, databases, computer networks, software, and web development. Strong communication and collaboration skills. Adept at working with diverse teams and adapting to dynamic environments.

Education

Universitas Alma Ata   **2021 - Present**

S1 Informatics, Yogyakarta

- Active in many committees and organizations and experience in several positions with a 3.90 out of 4.00 GPA.
- Become the 1st Winner in the E-Sport Mobile Legend Gemata 2022 tournament organized by BEM of Alma Ata University.

Skills

- HTML
- CSS
- JavaScript
- PHP
- SQL
- Figma

Organization and Committee Experience

Alma Ata University Informatics Student Association   **2023 – Present**

Communication and Information Division

- Responsible for publishing Instagram and YouTube social media content for the Alma Ata University Informatics Student Association.
- Make strategies and evaluations for the development of organizational social media.
- Collaborate with other association divisions and student organizations to cross-promote events and initiatives, fostering a sense of community and cooperation.

KBBMI (Learning Community with Informatics Students)   **2022**

Front-end Web Developer

- As a front-end web developer for the HIMUAA project, I contributed to the development of a website that serves as a platform for all student associations at Alma Ata University. In this role, I was responsible for designing and implementing the user interface using front-end technologies such as HTML, CSS, and JavaScript. I collaborated closely with the project team to understand the requirements and translate them into visually appealing, user-friendly designs.

Alma Ata University Informatics Student Association   **2021 – 2022**

Member Resource Development Division

- Responsible for developing the interests and talents of informatics students in the academic and non-academic fields.
- Initiated and coordinated monthly futsal and badminton activity, providing informatics students with opportunities for physical fitness, recreation, and social bonding.
- Pioneered the establishment of an e-sports community within the informatics program, recognizing the growing popularity and significance of competitive gaming.
